PROFESSIONAL SUMMARY

Java Full Stack Developer and 2026 Bachelor of Engineering (B.E.) graduate in AI & ML with hands-on experience building production-grade applications using Java Spring Boot, React.js, MySQL, and RESTful APIs. Experienced in microservices architecture, JWT authentication, CI/CD workflows with GitHub and Docker, and Agile/Scrum development practices. Skilled in writing unit tests (JUnit), applying data structures for algorithmic problem-solving, and deploying scalable full-stack applications. Certified in Full Stack Web Development (Tap Academy, 2026). Eager to contribute clean, maintainable code and a continuous learning mindset to a dynamic engineering team.

KEY SKILLS

Core Java · Advanced Java · OOP Concepts · Spring Boot · REST APIs · Microservices · MySQL / SQL · Hibernate / JPA · React.js · JavaScript · HTML5 / CSS · Python · JWT Auth · CI/CD · Docker · Git / GitHub · Postman · Agile / Scrum · JUnit · Data Structures & Algorithms

PROJECTS

Food Ordering Web Application

Nov 2025 – May 2026

Java Spring Boot · React.js · MySQL · JWT · Docker · GitHub · Postman · JUnit | Solo Project | Tap Academy

- Developed a full-stack Food Ordering Web Application using Java, Servlets, JSP, JDBC, MySQL, HTML, and CSS to provide a seamless online food ordering experience.
- Implemented key functionalities including user registration and authentication, menu browsing, cart management, and order placement with session handling.
- Integrated MySQL database with JDBC to efficiently manage user information, menu details, and order records while ensuring data consistency.
- Designed responsive and user-friendly web pages using HTML and CSS to enhance usability and provide an intuitive interface.
- Applied Object-Oriented Programming principles and the MVC architecture to build a scalable, maintainable, and well-structured application with reliable backend processing.

Prep Buddy — AI-Powered Mock Interview Platform

Jan 2025 – Mar 2026

Next.js · Google Gemini API · PostgreSQL · Clerk Auth · React Webcam · Vercel · Neon

- Launched a live AI mock interview platform (prep-buddy-project.vercel.app) serving role-specific interview preparation, by integrating Google Gemini API with Next.js and deploying on Vercel via a CI/CD pipeline.
- Reduced interview prep effort by generating 10+ role-specific questions per session in real time using Google Gemini API, with speech-to-text responses captured via React Webcam for a hands-free experience.
- Enabled persistent session tracking for all users by designing an efficient schema in serverless Neon PostgreSQL, with indexed data structures for fast per-user interview history retrieval.
